<p>Was Khadijah ever on any psychiatric medications?</p> <p>Yes, i dont have the names. She has two kids and after she had the last, she started to freak out on me (two years ago). Her kids father killed someone around the corner in my house and that had to do with do, and she started smoking marijuana and drinking a lot. She was going through something and we overlooked on it. He was abusive to her also, hitting her on the head. We have to make sure she goes on the right medications so she does not stop taking.</p>

<p>Is Khadijah currently on any medications?</p> <p>Yes, and when she was having episodes, she was having more and more. They were putting her on the bed, her mouth was weird. When she takes different meds and it does not make her feel good, she refuse them.</p> <p>Is Khadijah compliant with medications? if not, how often does Khadijah miss his/her medications?</p> <p>Yes, if they are giving her the right medications, but they were not giving the right ones. And normally she stops taking it after a while.</p>
