<p>Is Mitchell taking the medications prescribed by the Doctor? No, he doesn't. He does Self Medication. He has a bipolar disorder and he treats that with Xanax. So he had only Xanax addiction, and he even use cannabis that's help him to relax. But he doesn't use any other drugs.</p> <p>Is there any medications that works for Mitchell/ He has been using Xanax since 7 years. He suddenly cut off Xanax and Cannabis about 20 days ago, and he couldn't sleep for days, so he started having hallucinations.</p> <p>Does Mitchell have any side effects to certain medications? Xanax just makes him sleepy.</p> <p>Is Mitchell taking the medications prescribed by the Doctor? No, he doesn't. He does Self Medication. He has a bipolar disorder and he treats that with Xanax. <p>Does Mitchell have any medical diagnosis that he/she receives treatment for? No, he always use to self medicate himself. But he has his doctor who diagnosed him the bipolar disorder. I think years ago he got diagnosed for bipolar disorder. I am his wife and I live with him since last September. In the past years he had alcohol and cocaine addictions, but he doesn't have no more now. He doesn't use these drugs since last year.</p> <p>Does Mitchell have any medical diagnosis that he/she receives treatment for? No, he always use to self medicate himself.
